PROJECT
## HEALING ENVIRONMENT FOR GENERATIONS TO COME

Background:

Tourism and hospitality, is becoming a major industry in almost every country. Here comes an important role, in enriching the experience of the tourists. In order to remain the experience, a fascinating one, it is a small step from our side to maintain that gloriousness forever.

The world population is living, working, vacationing, increasingly conglomerating along the coasts and standing on the front row of the greatest, most unprecedented, plastic waste tide ever faced. One of the biggest lessons we have learnt whilst travelling is that plastic is a gigantic problem. A simple walk on any beach, or dustbins of a hotel room, or anywhere, and the plastic waste spectacle is present. All over the world the statistics are ever growing, staggeringly. The same is duly conveyed by a small video in the link mentioned infra.
